8. What do you see as being the role of the public sector vs. private sector in this space?

Hey private sector, give us open source & free data

Public sector can set data standard to better meet needs

Private sector should work with cities/DOTs to identify needs for data collection products

Cities will need to plan and implement, DOTs will likely provide the funding

Public sector can leverage the technology and private sector needs to share results

Who holds all the data for city vs. MPO vs. State
